

Company Profile & Product Catalog

Al-Kunooz Agricultural Solutions

Your Partner in Growth

شريكتك في النمو

About Us

Al-Kunooz Agricultural Solutions is a company specialized in supplying high-quality fertilizers and plant nutrients. We offer farmers and agricultural investors integrated solutions including soluble, liquid and granular compound fertilizers, secondary and micronutrient supplements, organic fertilizers and soil conditioners, growth regulators, and plant protection products and pesticides.

We believe the farmer's success is our success. That is why we choose our products carefully to meet the needs of different crops at every stage of growth – from root formation, to flowering and fruit set, to higher fruit quality and productivity – with better tolerance of drought and heat stress.

Our vision

To be the farmer's first and most trusted partner in agricultural solutions and plant nutrition.

Our mission

To provide effective, reliable agricultural products that raise crop productivity and quality, and to support farmers with the right knowledge and solutions.

Al-Kunooz Private Label

Products under the Al-Kunooz brand, designed to meet crop needs at every growth stage: from root formation to flowering and fruit set, through to fruit quality.

#01 Al-Kunooz Soluble NPK 20-20-20

الكنوز الذائب NPK 20-20-20

Formulation: 20-20-20 + T.E · **Available packs:** 1 kg

Chemical composition (W/W): Nitrogen (N) 20% · Phosphorus (P_2O_5) 20% · Potassium (K_2O) 20%

- Promotes balanced plant growth, improves fruit quality and increases stress resistance.
- Helps regulate the plant's physiological and hormonal balance; on contact with leaves or roots the nutrient separates from the chelate and is absorbed by the plant.
- Allows the plant to resume growth and production after weather events or chemical shock.

Crop	Rate
Protected (greenhouse) vegetables	1 – 3 kg / greenhouse (500 m ²)
Open-field vegetables	6 – 8 kg / feddan
Field crops (wheat, barley, alfalfa)	Foliar spray at 1 – 2 kg / feddan
Fruit trees	50 – 100 g / tree
Ornamental plants	1 – 2.5 g / L of water, to the soil
Cotton	6 – 8 kg / feddan

#02 Al-Kunooz Soluble NPK 11-44-11

الكنوز الذائب NPK 11-44-11

Formulation: 11-44-11 + T.E · **Available packs:** 1 kg

Chemical composition (W/W): Nitrogen (N) 11% · Phosphorus (P₂O₅) 44% · Potassium (K₂O) 11%

- Increases the number of flowers, helps fix fruit set and reduces fruit drop.
- A balanced ratio of nitrogen and potassium supports vegetative growth and higher production.
- Contains additives that help improve fertilizer uptake.
- Recommended in the early stages of cultivation, at flower formation and at the start of fruit formation.

Crop	Rate
Protected (greenhouse) vegetables	1 – 3 kg / greenhouse (500 m ²)
Open-field vegetables	6 – 8 kg / feddan
Field crops (wheat, barley, alfalfa)	Foliar spray at 1 – 2 kg / feddan
Fruit trees	50 – 100 g / tree
Ornamental plants	1 – 2.5 g / L of water, to the soil
Cotton	6 – 8 kg / feddan

#03 Kunooz NPK 18-46-5

كنوز 18-46-5

Formulation: 18-46-5 · **Available packs:** 5 L

Chemical composition: Nitrogen (N) 18% · Phosphorus (P) 46% · Potassium (K) 5%

- Raises the plant's resistance to stress.
- Helps the plant tolerate drought and heat stress.
- Fast dissolving and absorption: an advanced formulation that ensures nutrients are taken up quickly and easily.

#04 Al-Kunooz Liquid 0-30-40

الكنوز السائل 0-30-40

Formulation: 0-30-40 · **Available packs:** 1 L

Chemical composition (W/V): Nitrogen (N) 0% · Phosphorus (P_2O_5) 30% · Potassium (K_2O) 40%

- Improves root formation and flowering, and boosts root growth to increase water and nutrient uptake.
- A low salt index makes it a safe fertilizer for root application or foliar spraying.
- Safe on food crops thanks to its low heavy-metal content and high absorption.
- Its higher potassium-to-phosphorus content makes it ideal for application at the start of and during the season.

Crop	Timing	Soil application	Foliar spray
Potatoes	Three weeks after emergence; repeat 3 times, one dose per week	3 – 4 L / dunam	150 – 200 cm ³ / 100 L of water
Fruit trees	Just before sap flow / spring flush; repeat twice until shortly before harvest	3 – 4 L / dunam	150 – 200 cm ³ / 100 L of water
Protected and open-field vegetables	Just before flowering, spread until the end of the season	3 – 4 L / dunam	150 – 200 cm ³ / 100 L of water
Field crops	From just before the tillering stage	3 – 4 L / dunam	150 – 200 cm ³ / 100 L of water

#05 Al-Kunooz Liquid NPK 11-8-6

الكنوز السائل 11-8-6

Formulation: 11-8-6 + T.E · **Available packs:** Pack size to be confirmed

Chemical composition (W/V): Nitrogen (N) 11% · Phosphorus (P_2O_5) 8% · Potassium (K_2O) 6% · Iron (Fe) 50 ppm · Zinc (Zn) 50 ppm · Manganese (Mn) 25 ppm · Copper (Cu) 25 ppm

- Gives immediate vegetative growth, abundant production and good-quality fruit.
- Moderate levels of macronutrients plus the micro- and secondary nutrients needed for plant growth and development.
- Highly effective as a foliar fertilizer; also used in drip, mist and centre-pivot irrigation networks.

Crop	Rate
Protected (greenhouse) vegetables	2 – 3 L / greenhouse (500 m ²)
Open-field vegetables	1.5 – 2 L / feddan
Field crops (wheat, barley, alfalfa)	Foliar spray at 4 – 5 L / feddan
Fruit trees	50 – 75 ml / tree
House plants	25 ml (one cap) per litre of water, watered once a week
Foliar spray	150 – 250 ml / 100 L of water

#06 COLONEL – Liquid Compound Fertilizer

كولونيل COLONEL

Formulation: 0-40-60 · **Available packs:** 250 ml, 1 L

Chemical composition (W/V): Nitrogen (N) 0% · Phosphorus (P_2O_5) 40% · Potassium (K_2O) 60%

- New foliar-feeding technology to boost and activate plant growth, increase flowering, fix fruit set and improve fruit quality.
- Phosphate and potash compounds with a low salt index, keeping it safe even at higher concentrations in foliar sprays.
- Safe on plants at higher concentrations under different weather conditions.

#07 PHOSPHORO 0-60-5 + T.E

فسفورو PHOSPHORO

Formulation: 0-60-5 + T.E · **Available packs:** 1 L

Chemical composition (W/V): Nitrogen (N) 0% · Phosphorus (P_2O_5) 60% · Potassium (K) 5% · Trace elements (T.E) ✓

- A high-quality liquid compound with a high phosphorus content plus micronutrients.
- Helps prevent infection by fungi causing downy mildew, early and late blight, root rot and other fungal diseases.

#08 CAL MAG – Calcium & Magnesium Supplement

كالم كال CALMAG

Formulation: N 12% + CaO 15% + MgO 7.5% · **Available packs:** 250 ml, 1 L

Chemical composition (W/V): Nitrogen (N) 12% · Calcium oxide (CaO) 15% · Magnesium oxide (MgO) 7.5%

- Prevents blossom-end rot, bitter pit (brown spotting) on apples, and interveinal yellowing of older leaves.
- Prevents curved fruit, especially in cucumbers, and leaf drop from the base of new growth.
- Hardens stems and leaves and increases the plant's resistance to disease and changeable weather.
- Magnesium: builds chlorophyll molecules, activates enzymes and stimulates the synthesis of proteins and plant hormones.
- Calcium: builds the cell wall, improves fruit storage life, and increases tissue firmness and disease resistance.

Crop	Foliar	Soil	Timing
Tomato, cucumber, pepper, eggplant	200 – 400 cm ³ / 200 L	4 L / feddan	Before flowering and after fruit formation
Watermelon and melon	200 – 250 cm ³ / 200 L	4 – 8 L / feddan	Vegetative growth stage
Pome fruits	400 – 600 cm ³ / 200 L	50 – 75 cm ³ / tree	Start 4 weeks after fruit set and repeat weekly until maturity
Grapes	250 – 500 cm ³ / 200 L	25 – 50 cm ³ / vine	Start 3 weeks after fruit set

#09 Sulfur Green KS – Organic Formula

KS سلفر جرين

Formulation: S 40% + K₂O 35% · **Available packs:** 1 L, 5 L

Chemical composition (W/V): Sulfur (S) 40% · Potash (K₂O) 35%

- Used effectively against powdery mildew, with a noticeable effect on leaf miners and mites.
 - Thanks to its nutrient content it increases and strengthens plant growth, improving disease resistance and preventing fungal hyphae from penetrating plant tissue.
 - Used in rotation with powdery-mildew fungicides for better results and to prevent resistance.
-

Fortal Compound NPK Fertilizers

A wide range of compound fertilizers in four forms — water-soluble, suspension, liquid and granular — with multiple formulations to suit every stage of crop growth.

#10 Fortal Water Soluble NPK

أسمدة فورتال الذّوابة

Available packs: 1 kg, 10 kg, 25 kg

Available formulations: 20-20-20+T.E · 19-19-19+T.E · 30-10-10+T.E · 28-14-14+T.E · 15-30-15+T.E · 10-20-10+T.E · 10-0-40+T.E · 5-5-40+T.E · 12-6-36+T.E · 15-15-30+T.E

- Fortal soluble is distinguished by its high quality and contains all the nutrients a plant needs.
- Used with high efficiency in various irrigation systems because its solubility is higher than comparable products, being made from pure raw materials.

#11 Fortal Suspension NPK

أسمدة فورتال المعلّقة

Available packs: 1 kg, 5 kg, 15 kg, 20 kg

Available formulations: 22-22-22+1MgO+T.E · 20-20-20+3MgO+T.E · 40-10-10+T.E · 24-24-18+0.25MgO+T.E · 20-10-20+6MgO+T.E · 10-50-10+MgO+T.E · 0-50-30+T.E · 12-61-0+T.E · 10-10-60+T.E · 13-6-46+3MgO+T.E · 12-12-44+3MgO+T.E · 16-8-32+6MgO+T.E · 8-16-32+3MgO+T.E

- A ready-to-use fertilizer already dissolved in solution, so its uptake is assured.
- Prevents side reactions with soil components, which explains the plant's rapid response and maximum benefit.

#12 Fortal Liquid NPK

أسمدة فورتال السائلة

Available packs: 1 L, 5 L, 20 L

Available formulations: 10-10-10+T.E · 40-0-0+T.E · 11-8-6+T.E · 5-75-3+T.E · 0-34-43+T.E

- Can be applied to the soil or as a foliar spray.
- Contains amino acids that reduce plant stress, with results that can be seen quickly.
- A high-efficiency fertilizer thanks to its organic additives.

#13 Fortal Granular NPK

أسمدة فورتال المحببة

Available packs: 25 kg, 50 kg

Available formulations: 15-15-15+MgO+S+Fe+T.E · 18-18-5+1.5MgO+S+Fe+T.E · 11-22-16+MgO+S+Fe+T.E · 12-12-17+MgO+S+Fe+T.E

- A gradually dissolving granular compound fertilizer containing the major nutrients, a good level of magnesium, plus iron and other elements.
 - Feeds the plant over a long period according to irrigation, as part of the fertilizer dissolves with each watering.
-

Micronutrients

High-purity, fast-absorbing chelated micronutrients to treat and prevent deficiency symptoms, including in alkaline and calcareous soils.

#14 Microfert Combi

میکروفیرت کومبی

Available packs: 1 kg, 5 kg

Formula	Fe	Zn	Mn	Cu	Mg	B	Mo
Combi 1	4%	4%	3%	2%	0.5%	1.5%	0.05%
Combi 2	4%	2.5%	1.5%	1.5%	5.0%	—	0.03%
Combi 3	9.3%	0.2%	2%	0.15%	2%	0.4%	0.1%

- A mix of micronutrients chelated with EDTA and citric acid.
- Easily and quickly absorbed by the plant, and efficiently treats problems caused by micronutrient deficiency.

#15 Zinca Boro

زنکا بورو

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Zinc (Zn) 48 g/kg · Boron (B_2O_3) 145 g/kg · Fulvic acid 40 g/kg · Nitrophenol 30 g/kg · Amino acids 40 g/kg

- A modern compound that plays a major role in protecting plants, especially during drought.
- Activates tryptophan, which produces IAA during flower-bud opening and fruit set.
- Regulates water movement within the plant and prevents stunting or rosetting.
- Increases storage of zinc and boron in dormant buds for the next season and improves their movement within plant tissue.

#16 Microfert Fe EDDHA 6%

EDDHA 6% حديد میکروفیرت مخلب

Available packs: 1 kg, 5 kg

Chemical composition (W/W): EDDHA-chelated iron (Fe) 6%

- Contains iron in a concentrated, homogeneous and balanced form to treat visible deficiency, and prevents deficiency symptoms when used as directed.
- Easily absorbed; helps increase yield and improve its quality.
- Effective in alkaline, calcareous and limestone soils.

#17 Microfert Single Chelates

میکروفیرت عناصر

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Chelated zinc (EDTA Zn) 15% · Chelated iron (EDTA Fe) 13% · Chelated copper (EDTA Cu) 15% · Chelated manganese (EDTA Mn) 13% · Chelated calcium (EDTA Ca) 10% · Chelated magnesium (EDTA Mg) 6%

- High-quality fertilizers made from pure materials, each element in its own pack.
- Rapidly absorbed by the plant for maximum benefit.

#18 Power Boron B 15%

باور بورون

Available packs: Pack size to be confirmed

Chemical composition: Boron (B) 15%

- A concentrated 15% boron fertilizer.
- Boron is essential for flowering, pollination and fruit set.

Calcium & Fruit-Set Specialties

Specialty formulations to improve fruit set and fruit quality, and to prevent calcium-deficiency problems such as blossom-end rot and flower drop.

#19 Max Cal Bor 18 / 30

ماكس كالبور 30 / 18

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Max Cal Bor 30 CaO 30% + B 1% · Max Cal Bor 18 CaO 18% + B 6%

- A formulation rich in calcium and boron to reduce flower and fruit drop and improve fruit quality.
- Used as a foliar spray or applied to the soil.
- Calcium builds the cell wall, and boron fixes calcium in the cell wall.

#20 Microfert Cal

ميكروفيرت كال

Available packs: 1 L, 5 L, 20 L

Chemical composition (W/V): Nitrogen (N) 12% · Calcium (CaO) 20% · Magnesium (MgO) 3%

- Contributes to producing high-specification fruit.
- Prevents blossom-end rot and brown spotting (bitter pit) on apples.
- Prevents interveinal yellowing of older leaves and curved fruit, especially in cucumbers.
- Prevents leaf drop from the base of new growth.

#21 Microfert Cal Mag

ميكروفيرت كال ماك

Available packs: 1 L, 5 L, 20 L

Chemical composition (W/V): Nitrogen (N) 12% · Calcium (CaO) 16% · Magnesium (MgO) 7.5%

- Contains root stimulants and organic compounds that chelate calcium and magnesium.
- Hardens stems and leaves and increases the plant's resistance to disease and changeable weather.
- Very effective in fertigation because the calcium and magnesium are easily absorbed and stable in the irrigation solution.

#22 Fruitium

فروتیوم

Available packs: 100 g

Chemical composition (W/W): Nitrogen (N) 4% · Molybdenum (Mo) 3% · Phosphorus (P_2O_5) 21%

- A compound of several fertilizer and organic elements that plant cells absorb quickly and easily.
 - Boosts natural fruit-set hormones when sprayed on protected and open-field vegetables under all conditions.
 - Overcomes the effect of temperature on fruit set: spray in winter when temperatures are low and in summer when they are high.
-

Smart Nutrition & Protection Compounds

Compounds that combine nutrition with strengthening plant defences at the same time, using phosphonate and low-salt-index technologies.

#23 Phosphogreen Zn

فوسفوجرين Zn

Available packs: 1 L, 5 L

Chemical composition (W/V): Zinc (Zn) 40 g/L · Boron (B_2O_3) 10 g/L · Calcium (CaO) 60 g/L · Phosphorus (P_2O_5) 100 g/L

- A modern compound that protects plants against weather fluctuations, especially during drought.
- Activates tryptophan, which produces the hormone IAA, during flower-bud opening and fruit set.
- Regulates water movement within the plant and prevents stunting or rosetting.

#24 Phosphogreen K

فوسفوجرين K

Available packs: 1 L, 5 L

Chemical composition (W/V): Nitrogen (N) 3% · Potassium (K_2O) 18% · Phosphorus (P_2O_5) 27%

- A liquid fertilizer rich in phosphorus and potash, plus nitrogen and chelated micronutrients.
- For prevention of blights, downy mildew and soil-borne fungi.
- Improves fruit colour, taste and shape, and increases firmness and storability.
- Its nitrogen content increases the product's foliar nutrient uptake.

#25 Phosphogreen Mg

فوسفوجرين Mg

Available packs: 1 L, 5 L

Chemical composition (W/V): Potassium (K_2O) 6% · Phosphorus (P_2O_5) 19% · Magnesium (MgO) 6%

- An agricultural fertilizer and a biochemical protectant at the same time.
- Increases synergy between nutrients — magnesium increases phosphorus uptake.
- Combines magnesium and potassium despite the antagonism between them.
- Most efficient at fruiting, when the plant's need for potassium and magnesium is highest.

#26 Phosphogreen Ca

فوسفوجرين Ca

Available packs: 1 L, 5 L

Chemical composition (W/V): Boron (B_2O_3) 3% · Calcium (CaO) 6% · Phosphorus (P_2O_5) 33%

- A unique formulation combining calcium and phosphorus without antagonism.
- An agricultural fertilizer and a biochemical protectant at the same time.
- Supplies calcium and phosphorus together when the plant needs them most.

#27 TURBO

تيربو

Available packs: 1 L, 5 L

Chemical composition (W/V): Potassium (K_2O) 60%

- A modern foliar nutrient that activates the plant, increases growth, flowering and fruit set, and improves fruit quality.
- Potassium activates enzymes during photosynthesis and the synthesis of sugars and proteins.
- Plants treated with TURBO become stronger and more resistant to harsh weather and water shortage.

#28 ACTIVAL

أكتيفال

Available packs: 1 L, 5 L

Chemical composition (W/V): Nitrogen (N) 25% · Potassium (K_2O) 25% · Phosphorus (P_2O_5) 25%

- New foliar-feeding technology to increase growth, flowering and fruit set and improve fruit quality.
- Suitable for all growth stages.
- Low salt index, keeping it safe even at higher concentrations and under different weather conditions.

#29 SOLO-K

سولو-ك

Available packs: 1 L, 5 L

Chemical composition (W/V): Potassium (K_2O) 8% · Sulfur (S) 75%

- High-concentration sulfur in an easily dispersed, homogeneous suspension that gives the best results and a rapid effect on fungal diseases.
- Spreads over the leaves, forming a barrier layer that prevents fungi from living on the leaf surface.
- Prevents fungal hyphae from entering plant tissue, especially powdery and downy mildew fungi.

#30 CORRECTOR

کورکتر

Available packs: 1 L, 5 L, 20 L

Chemical composition (W/V): Nitrogen (N) 10% · Organic matter 20%

- An acidity regulator and soil conditioner.
 - Releases nutrients locked in the soil and makes them available for uptake by lowering soil and water pH.
 - Cleans irrigation systems and clears networks of lime deposits and algae.
 - Increases the efficiency of nutrient uptake from soil and fertilizer.
-

#31 MAX CUIVRE

ماکس کویفر

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Copper dicarboxylate (Cu) 91%

- A broad-acting organic copper fertilizer.
 - Contains organic copper at the highest possible concentration, reflected in application rates and effectiveness.
 - Copper in a form that is absorbed by and penetrates the leaves.
 - A safe compound that can be used in organic farming programmes.
-

Smart Organic Fertilizers

Organic fertilizers, soil conditioners and natural extracts (amino acids, humic and fulvic acids, seaweed) to improve soil fertility and plant health and increase yield.

#32 NITROFERT

نيتروفيرت

Available packs: 1 L, 5 L

Chemical composition (W/V): Amino acids 5% · Organic matter 26% · Organic nitrogen 10%

- A liquid organic nutrient rich in organic matter, amino acids and organic nitrogen from natural sources.
- Increases resistance to weather conditions and encourages growth, especially vegetative growth.
- Increases yield per unit area and gives plants a healthy, fresh appearance.
- Can be used on all crops and at all stages.

#33 ORGA MICRO

أورجا مايكرو

Available packs: 1 L, 5 L

Chemical composition (W/V): Copper (Cu) 1.2% · Potassium (K₂O) 14.4% · Phosphorus (P₂O₅) 14.4%

- A liquid fertilizer containing phosphorus, copper, potash and organic matter, combining the effect of phosphorus in activating the plant's natural defences.
- Copper reduces the spread of infection by acting as a barrier against pathogen penetration.
- Increases the plant's nutrient reserves, raising its disease resistance.
- Can be applied at all growth stages.

#34 MICROSEPT LIQUIDE

ميكروسات السائل

Available packs: 1 L, 5 L

Chemical composition (W/V): Iron (Fe) 7% · Nitrogen (N) 8% · Amino acids 25%

- A fertilizer containing nitrogen and iron, plus organic matter and nutrients from natural sources.
- The organic matter naturally chelates the nutrients, ensuring their uptake and improving quality and yield naturally and safely.
- High quality and made from pure materials; easily and quickly absorbed through leaves and roots.

#35 ORGANOCOPPER

أورجانوكبر

Available packs: 1 L, 5 L

Chemical composition (W/V): Chelated copper carboxylate (Cu) 15%

- A liquid fertilizer rich in copper in organic carboxylate form, offering high absorption through leaf stomata.
 - Copper is a vital nutrient that strengthens the plant and helps it tolerate unfavourable environmental conditions.
 - Improves chlorophyll formation and the synthesis of proteins and vitamins, and increases natural growth hormones.
-

#36 ORGANOCOPPERFOSTYL 10%

%أورجانوكبرفوستيل 10

Available packs: 1 L

Chemical composition (W/V): Copper (Cu) 10% · Phosphorus (P₂O₅) 10%

- An organically coated copper phosphonate, more persistent on leaf surfaces and in the soil; effective as a spray and through soil irrigation.
 - Strong effect on rots, anthracnose, blights, Pythium, Verticillium, Fusarium and downy mildew.
 - High ability to inhibit the growth and reproduction of fungi and bacteria.
 - Efficiently treats copper and phosphorus deficiency symptoms.
-

#37 MARINA X – Seaweed Extract

مارينا إكس

Available packs: 1 L, 5 L

Chemical composition (W/V): Nitrogen (N) 2% · Potassium (K₂O) 3% · Phosphorus (P₂O₅) 2%

- A natural fertilizer extracted from seaweed (Ascophyllum) containing more than 60 macro- and micro-elements.
 - Contains natural growth regulators, organic acids and sugars.
 - Keeps plants consistently healthy and reduces their need for irrigation, fertilizers and pesticides.
-

#38 AMINOFERT

أمينوفيرت

Available packs: 1 L, 5 L, 20 L

Product	Chemical composition
Aminofert Combi	Fe 1.5%, Zn 1.6%, MgO 2.4%, B 0.5%, Mn 1%, Mo 0.1%, Amino Acid 12%
Aminofert Micro	N 10%, P ₂ O ₅ 5%, K ₂ O 8%, O.M 15%, Amino Acid 12%
Aminofert Nitro	N 1.5%, O.M 30%, Amino Acid 24%
Aminofert Iron	N 6%, Fe 6%, Amino Acid 12%
Aminofert Magnesium	N 1.2%, MgO 6%, Amino Acid 12%
Aminofert Manganese	N 1.2%, Zn 6%, Amino Acid 12%

- Amino acids are important in photosynthesis, protein formation and respiration; supplying them speeds up biochemical reactions, activates growth and saves the plant energy.
- Amino acids act as a natural chelator, ensuring nutrient efficiency and availability for foliar uptake.

#39 BIOHUME Fe 80%

بيوهيوم Fe 80%

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Iron (Fe) 1% · Humic acid 80%

- Contains 80% organic matter in the form of humic and fulvic acids.
- Used as a natural organic fertilizer for all soil types and all crops.
- Increases the soil's water-holding capacity, fertility and productivity.
- Raises seed germination, improves produce quality and increases yield per unit area.

#40 BIOEXTRACT

بيواكستراكت

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Nitrogen (N) 4% · Potassium (K₂O) 2% · Phosphorus (P₂O₅) 2%

- A fully soluble powder extracted from seaweed (Ascophyllum).
- Contains growth regulators, proteins, amino acids, carbohydrates, vitamins, cytokinins, auxins, alginic acid and gibberellins.
- Stimulates the growth and development of branches, stems and roots.
- Increases crop resistance to difficult weather and reduces the effect of stress.

#41 BIOFERT Powder

بيوفيرت بودرة

Available packs: 1 kg, 5 kg

Chemical composition (W/W): Humic and fulvic acids 85%

- Organic acids in a fully water-soluble powder.
- Increase the soil's water-holding capacity, fertility and productivity.
- Loosen heavy soils, help bind sandy soils and increase root growth.
- Release nutrients locked in the soil, reducing the need for chemical fertilizers.

#42 BIOFERT Liquid

بيوفيرت السائل

Available packs: 1 L, 5 L, 20 L

Chemical composition (W/V): Fulvic acid 3% · Humic acid 12%

- Stimulates the plant to form and develop its root system quickly.
- Increases the rate of ion exchange, improving the roots' ability to absorb nutrients.
- Helps the plant resist weather conditions, pests and diseases.
- Balances soil pH, limits the effect of salts and releases locked-up nutrients.

#43 FORTAL ORGANIC 3-14-3

فورتال العضوي 3-14-3

Formulation: 3-14-3 · **Available packs:** 25 kg

Chemical composition (W/W): Nitrogen (N) 3% · Phosphorus (P_2O_5) 14% · Potassium (K_2O) 3% · Humic acid 5% · Calcium (CaO) 6% · Organic matter 35%

- A granular fertilizer rich in nutrients chelated on organic compounds, with a high phosphorus content in both slow- and fast-release forms.
- Contains beneficial micro-organisms and humic (dubal) acid, which increase the benefit from mineral fertilizers.
- Repeated application does not create undesirable compounds, thanks to its balanced mineral and organic content.

#44 ELBARAK

البرق

Available packs: 1 L, 5 L

Chemical composition (W/V): Boron (B_2O_3) 0.5% · Nitrogen (N) 3.5% · Potassium (K_2O) 13% · Molybdenum (Mo) 0.2% · Organic matter 30%

- A distinctive formulation containing natural extracts and growth stimulants.
- Contains organic matter, organic nitrogen and potash — important for fruiting, higher yield and better fruit quality and colour.
- Protects the plant against weather fluctuations and increases resistance to various diseases.

#45 ORGANOBRO 5-15-5

أورجانوبرو 5-15-5

Formulation: 5-15-5 · **Available packs:** 25 kg

Chemical composition (W/W): N-P-K 5-15-5 · Humic acid 6%

- A fertilizer rich in nutrients chelated on organic compounds.
 - A high organic-matter content in both slow- and fast-release forms.
 - Contains beneficial micro-organisms and a high level of nutrient-enriched humic (dubal) acid.
 - Mineral nutrients are chelated organically, from entirely organic sources.
-

#46 ANTI-SAL

أنتي سال

Available packs: 1 L, 5 L

Chemical composition (W/V): Calcium (CaO) 10% · Organic matter 30%

- Effective in treating the build-up of toxic salts in the soil, such as sodium and chloride salts, and reduces irrigation-water salinity.
 - Displaces and removes soil salts.
 - Eases the effect of salinity on roots by reducing osmotic pressure, and improves nutrient uptake.
 - Improves the soil's physical properties and increases the activity of soil micro-organisms.
-

Plant Growth Regulators

Plant growth regulators to improve fruit set under critical conditions, increase fruit size, and encourage rooting of cuttings.

#47 FERTIL FLORAL (4CPA + BNOA)

فرتل فلورل

Available packs: 100 ml

Chemical composition: 4-CPA Para Chloro Phenoxy Acetic Acid · BNOA Beta Naphthyloxy Acetic Acid

- A fruit-set regulator for tomato, eggplant and pepper.

#48 BETA HOUR (BNOA)

بيتا هور

Available packs: 100 ml

Chemical composition: Beta Naphthyloxy Acetic Acid (BNOA) 50 g/L

- A plant fruit-set regulator for critical and harsh conditions.
- Used to increase fruit set of tomato, eggplant, pepper and squash inside and outside plastic greenhouses.

#49 CIPA HOUR (4-CPA)

سيپا هور

Available packs: 100 ml

Chemical composition: Para Chloro Phenoxyacetic Acid 7 g/L

- A plant bio-regulator used for fruit set in the nightshade family (tomato, eggplant, pepper).
- Used at low temperatures.

#50 GIBBERELYINE (GA3)

جيرلين

Available packs: 100 ml

Chemical composition: Gibberellic Acid (GA3) 20 g/L

- Carried in an effective organic form; increases cell elongation and breaks dormancy in potatoes.
- Increases fruit size in grapes and citrus, especially seedless grapes, and bananas.
- Increases stem elongation in ornamental plants.
- Has a clear effect on increasing flower set in citrus trees.

#51 ENDOLIN (IBA)

إندولين

Available packs: 100 ml

Chemical composition: Liquid Indole-3-Butyric Acid (IBA) 10 g/L

- A plant growth regulator that encourages stem cuttings to root, carried in a liquid organic form for reliable results.
- Used for all types of softwood and hardwood cuttings.

Cutting type	Dilution
Soft cuttings	1 part Endolin + 10 parts water
Semi-hard cuttings	1 part Endolin + 5 parts water
Hard cuttings	1 part Endolin + 2 parts water

Eco-Friendly Organic Plant Protection

Eco-friendly plant-extract products suitable for organic farming and Integrated Pest Management (IPM) programmes, combining nutrition and protection.

#52 BIOACT (1)

بيوأكت (1)

Available packs: 250 ml

Chemical composition (W/V): Nitrogen (N) 5% · Potassium (K₂O) 5% · Phosphorus (P₂O₅) 2% · Organic matter 25%

- Modern plant-extract technology for nutrition and protection at the same time.
- Suitable for organic and sustainable farming systems, and used in IPM programmes.
- A plant extract with an effect on mites, worms and leaf miners.

#53 BIOACT (2)

بيوأكت (2)

Available packs: 250 ml

Chemical composition (W/V): Nitrogen (N) 6% · Potassium (K₂O) 3% · Phosphorus (P₂O₅) 2% · Organic matter 25%

- Modern plant-extract technology for nutrition and protection at the same time.
- Suitable for organic and sustainable farming systems, and used in IPM programmes.
- Effective on aphids, thrips and whitefly, without affecting flower set.

#54 NEMAGUARD

نيماجارد

Available packs: 250 ml, 1 L

Chemical composition (W/V): Nitrogen (N) 2.5% · Potash 2.5% · Organic matter 25%

- Used in foliar feeding programmes as it contains nitrogen, potash and growth regulators of natural plant origin; increases and maintains moisture permeability in leaves.
- A plant oil extracted from neem trees, containing azadirachtin, nimbin and salannin.
- Used in organic farming; listed by the organic-farming body OMRI.

#55 MICRO STICK

میکروستیک

Available packs: 1 L

Chemical composition (W/V): Polymer nitrogen 100 g/L

- An emulsifiable (EC) organic spreader, sticker and nutrient that wets treated plant surfaces.
 - Highly synergistic with most products sprayed on foliage, especially pesticides and foliar fertilizers.
 - Contains slow-release nitrogen, giving pesticides a longer period of effect.
-

Pesticides

Registered insecticides and herbicides. All pesticides must be used according to the instructions and doses on the label, while wearing protective clothing, observing the pre-harvest interval, and stored out of the reach of children.

#56 AGROCEL 44% EC

أجروسيل 44% إي سي

Available packs: 1 L

Chemical composition (EC): Profenofos 40% (400 g/L) · Cypermethrin 4% (40 g/L)

- A mixed emulsifiable insecticide for controlling worms and all types of chewing and sucking insects.
- The product is classified as "toxic": use only according to the label instructions.

#57 AGROMETHRIN 10% EC

أكروميثرين 10% إي سي

Available packs: 100 ml

Chemical composition (EC): Cypermethrin 10% EC

- Insecticide.
- Registration number: 1678 – Country of origin: India.

#58 SAADSATE 36% SL

سعد سات 36% إس إل

Available packs: 1 L, 20 L

Chemical composition (SL): Glyphosate 36% SL

- A systemic, non-selective herbicide (soluble concentrate).
- Controls annual and perennial narrow-leaf and broad-leaf weeds.
- Toxicity class: III.

#59 AGROGOAL 24% EC

أجروقول 24% إي سي

Available packs: 1 L

Chemical composition (EC): Oxyfluorfen 24% EC

- A herbicide for controlling annual broad-leaf weeds and most annual grass weeds.
- Used in onion, garlic and cotton, pre- and post-emergence.
